NCapsul's Medication Advice Line Pharmacists

Our On-Call Clinical Pharmacists are ... "Making Medicine Simple" by:

- Working with your patients to Prevent Medication Errors (a deadly issue we see far too often).
- Saving your staff time by immediately answering medication related questions.
- Providing Confidence that a highly-trained and experienced clinical pharmacist is investigating your question.

Our On-Call Clinical Pharmacists Provide:

- Answers to your staff's and patients medication-related questions.
- Research on complicated or time-consuming questions.
- A way to double check your dosing or rate calculations for patients.
- A way to Double-check IV/IM/SC drug compatibility.
- Pill identification.
- Information on potential drug interactions/adverse drug reactions.
- Advice on any other medication-related issues that arise.

Our On-Call Clinical Pharmacists have:

- Doctorate level Degrees in Pharmacy
- Extensive experience in providing direct-patient care related to medication management and medication information.
- Experience working directly with physicians, nurses, and other health care providers on medication-related issues.
- Experience providing direct medication expertise at nationally ranked healthcare institutions, such as The John Hopkins Hospital (#1 hospital in the nation), Kaiser Permanente (large, reputable health care system), Veteran Affairs System (system that provides healthcare to Veterans), and nationally-recognized Schools of Pharmacy such as University of California, San Francisco.
- Time to spend focusing on your questions. Their only job with Ncapsul is to answer YOUR questions.
